UniversalDoctor

UniversalNurses

UniversalWomen

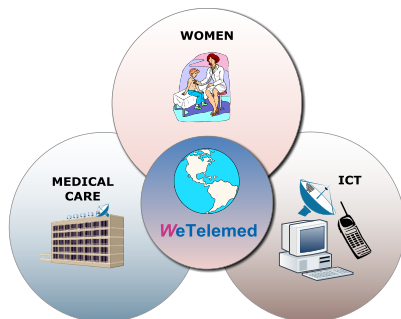

UniversalDoctor has been working to facilitate communication between health professionals and patients from different backgrounds. We employ multimedia technology to develop different applications with the goal of helping to improve multilingual communication and integration.

Multiple Implementations and New Applications with Millennia2025Foundation

UniversalDoctor's applications have been implemented in more than 50 hospitals around the world. Now UniversalDoctor and Millennia2025Foundation are working together to develop UniversalNurses and UniversalWomen.

WeTeled: www.millennia2015.org/WeTeled

The screenshot shows the WeTeled website interface. At the top, there is a navigation bar with the 'millennia2015' logo and a grid of diverse people's faces. Below this, a purple navigation bar contains 'Home', 'About Us', and 'Registration'. A left sidebar lists various user roles and services such as 'Home', 'My Profile', 'My Courses', 'My Events', 'My Documents', 'My Support', 'My Account', 'My Settings', 'My Profile', 'My Documents', 'My Support', 'My Account', 'My Settings', 'My Profile', 'My Documents', 'My Support', 'My Account', 'My Settings'. The main content area features the title 'WeTeled, Global Network of Women in Telemedicine' and a 'Welcome to WeTeled 2015' message. A central graphic displays the 'millennia2015 Foundation WeTeled' logo. Below this, a word cloud contains terms like 'Telemedicine', 'Women', 'WeTeled', 'Millennia2015', 'Global Network', 'Telemedicine', 'Women', 'WeTeled', 'Millennia2015', 'Global Network'. Two callout boxes labeled 'EVENTS' and 'COURSES' are visible at the bottom, each containing a list of items with icons and brief descriptions.

The Gorgas Courses in Clinical Tropical Medicine
Selected Cases Seen by 2014 Course Participants

UNIVERSITY OF ALABAMA AT BIRMINGHAM Knowledge that will change your world
UNIVERSIDAD CAYETANO I

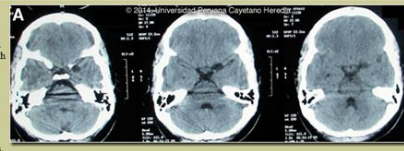

Gorgas Case 2014-1
Presentation
 (Links to other 2014 Cases are at bottom of this page)

The Gorgas Courses in Clinical Tropical Medicine are given at the Tropical Medicine Institute at Cayetano Heredia University in Lima, Peru. For the 14th consecutive year, we are pleased to share interesting cases seen by the participants that week during the February/March course offerings. Presently the 9-week Gorgas Course in Clinical Tropical Medicine is in session. New cases will be posted every Tuesday/Wednesday for the next nine weeks. Each case includes a brief history and pertinent digital images, followed by a link to the actual diagnosis and a brief discussion.

David O. Freedman & Eduardo Gotuzzo
 Course Directors

The following patient was seen in the inpatient department of the 36-bed Tropical Disease Unit at Cayetano Heredia National Hospital in Lima, Peru.

History: 27-year-old female with a 1-year history of progressively severe frontal headache. Pain that was initially 2/10 intensity and lasting 2-3 hours every 2 to 3 days, progressed to 10/10 fronto-parietal headaches associated with nausea and vomiting. During an assessment at an outside private hospital 9 months before admission, visual aura, profuse sweating, and urinary and fecal incontinence were witnessed. CT scan of the brain was normal and a diagnosis of a complex migraine and sinusitis was made. One month before admission she presented with a sudden episode of nausea, vomiting, blurred vision, diplopia, and urinary and fecal incontinence with loss of consciousness. An outside MRI was reported as normal. Four similar episodes in the ensuing month led to her admission to our hospital. She denies fever, back pain, or head trauma.

Epidemiology: Born and lived on a farm in Huásmo in the Andean highlands of Peru until age 8 years with exposure to cows, pigs, sheep and dogs. Currently lives and works in Lima as a maid and travels to Huásmo occasionally for 2 to 3 days. No known TB exposure; no illicit drug use; no risk factors for STDs.

2e colloque de l'ITMO Santé publique - Médecine « personnalisée » et innovations biomédicales : enjeux de santé publique, économiques, éthiques et sociaux

L'Institut thématique multi-organismes de Santé publique organise son deuxième colloque annuel le **jeudi 5 décembre 2013** au grand auditorium de la Bibliothèque nationale de France (Paris 13e), sur le thème de la médecine dite « personnalisée ».

La médecine « personnalisée » va constituer un axe important du programme européen Horizon 2020 ces prochaines années. La deuxième édition du colloque de l'ITMO Santé Publique s'inscrit dans cette thématique en réunissant les chercheurs et les acteurs de la santé publique autour des enjeux de santé publique, économiques, éthiques et sociaux liés à la médecine « personnalisée » et aux innovations biomédicales. Le colloque donnera lieu à des échanges pluridisciplinaires entre porteurs d'innovations médicales et chercheurs en sciences humaines, économiques et sociales et en épidémiologie et santé publique.

La journée sera organisée en trois sessions, introduites par des conférences invitées de **Ruth Chadwick** (Cardiff University) et **Ivo Gut** (Centre Nacional d'Anàlisi Genòmica, Barcelone), **Véronique Thouvenot** (Fondation Millennia 2025, Genève) et **Isaac Kohane** (Harvard Medical School), **Bartha Knoppers** (McGill University, Montréal) et **Theresa Marteau** (King's College, Londres). L'évènement permettra également de présenter les recherches en cours dans le cadre de l'Alliance Nationale pour les Sciences de la Vie et de la Santé et sera clôturée par une table ronde présidée par **Jean-Paul Moatti** (directeur de l'ITMO Santé Publique).
